

SAFETY INSTRUCTIONS

IMPORTANT TO BE READ AND OBSERVED

Before using the appliance, read these safety instructions. Keep them nearby for future reference.

These instructions and the appliance itself provide important safety warnings, to be observed at all times. The manufacturer declines any liability for failure to observe these safety instructions, for inappropriate use of the appliance or incorrect setting of controls.

⚠ Very young children (0-3 years) should be kept away from the appliance. Young children (3-8 years) should be kept away from the appliance unless continuously supervised. Children from 8 years old and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge can use this appliance only if they are supervised or have been given instructions on safe use and understand the hazards involved. Children must not play with the appliance. Cleaning and user maintenance must not be carried out by children without supervision. Children aged from 3 to 8 years are allowed to load and unload refrigerating appliances.

PERMITTED USE

⚠ CAUTION: The appliance is not intended to be operated by means of an external switching device, such as a timer, or separate remote controlled system.

⚠ This appliance is intended to be used in household and similar applications such as: staff kitchen areas in shops, offices and other working environments; farm houses; by clients in hotels, motels, bed & breakfast and other residential environments.

⚠ This appliance is not for professional use. Do not use the appliance outdoors.

⚠ The bulb used inside the appliance is specifically designed for domestic appliances and is not suitable for general room lighting within the home (EC Regulation 244/2009).

⚠ The appliance is designed for operation in places where the ambient temperature comes within the following ranges, according to the climatic class given on the rating plate.

The appliance may not work properly if it is left for a long time at a temperature outside the specified range.

Climatic class ambient temperatures:

SN: From 10°C to 32°C ; N: From 16°C to 32°C

ST: From 16°C to 38°C ; T: From 16°C to 43°C

⚠ This appliance does not contain CFCs. The refrigerant circuit contains R600a (HC).

Appliances with Isobutane (R600a): isobutane is a natural gas without environmental impact, but is flammable. Therefore, make sure the refrigerant circuit pipes are not damaged, especially when emptying the refrigerant circuit.

⚠ WARNING: Do not damage the appliance refrigerant circuit pipes.

⚠ WARNING: Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

⚠ WARNING: Do not use mechanical, electric or chemical means other than those recommended by the Manufacturer to speed up the defrost process.

⚠ WARNING: Do not use or place electrical devices inside the appliance compartments if they are not of the type expressly authorised by the Manufacturer.

⚠ WARNING: Ice makers and/or water dispensers not directly connected to the water supply must be filled with potable water only.

⚠ WARNING: Automatic ice-makers and/or water dispensers must be connected to a water supply that delivers potable water only, with mains water pressure between 0,17 and 0,81 MPa (1,7 and 8,1 bar).

⚠ Do not store explosive substances such as aerosol cans and do not place or use gasoline or other flammable materials in or near the appliance.

⚠ Do not swallow the contents (non-toxic) of the ice packs (provided with some models). Do not eat ice cubes or ice lollies immediately after taking them out of the freezer since they may cause cold burns.

⚠ For products designed to use an air filter inside an accessible fan cover, the filter must always be in position when the appliance is in function.

⚠ Do not store glass containers with liquids in the freezer compartment since they may break. Do not obstruct the fan (if included) with food items.

After placing the food check that the freezer door closes properly.

⚠ Damaged gaskets must be replaced as soon as possible.

⚠ Use the freezer compartment only for storing frozen food, freezing fresh food and making ice cubes.

⚠ Avoid storing unwrapped food in direct contact with internal surfaces of the freezer compartments.

⚠ C-Pentane is used as blowing agent in the insulation foam and it is a flammable gas.

The most appropriate compartments of the appliance where specific types of food are to be stored, taking into account different temperature

distribution in different compartments in the appliance, are as follows:

4 star zone (****) compartment is suitable for freezing foodstuffs from ambient temperature and for storing frozen food as the temperature is evenly distributed throughout the entire compartment. Purchased frozen food has the storage expiration date stated on the packaging. This date takes into account the type of food being stored and therefore this date should be respected. Fresh food should be stored for the following time periods: 1-3 months for cheese, shellfish, ice cream, ham/sausage, milk, fresh liquids; 4 months for steak or chops (beef, lamb, pork); 6 months for butter or margarine, poultry (chicken, turkey); 8-12 months for fruits (except citrus), roast meat (beef, pork, lamb), vegetables. Expiration dates on the packaging of foods in the 2-star zone must be respected.

To avoid food contamination, please observe the following:

- Opening the door for long periods can cause a significant increase of the temperature in the compartments of the appliance.
- Regularly clean surfaces that may come into contact with food and accessible drainage systems.
- Clean water tanks if they have not been used for 48 h; flush the water system connected to a water supply if water has not been drawn for 5 days.
- Store raw meat and fish in suitable containers in the refrigerator, so that it does not come into contact with or drip onto other food.
- Two-star frozen food compartments are suitable for storing pre-frozen food, storing or making ice cream and ice cubes.
- Do not freeze fresh food in one, two or three-star compartments.
- If the refrigerating appliance is left empty for long periods, switch off, defrost, clean, dry, and leave the door open to prevent mould developing inside the appliance.

INSTALLATION

⚠ The appliance must be handled and installed by two or more persons - risk of injury. Use protective gloves to unpack and install - risk of cuts.

⚠ Installation, including water supply (if any), electrical connections and repairs must be carried out by a qualified technician. Do not repair or replace any part of the appliance unless specifically stated in the user manual. Keep children away from the installation site. After unpacking the appliance, make sure that it has not been damaged during transport. In the event of problems, contact the dealer or your nearest After-sales Service. Once installed, packaging waste (plastic, styrofoam parts etc.) must be stored out of reach of children - risk of suffocation. The appliance must be

disconnected from the power supply before any installation operation - risk of electrical shock. During installation, make sure the appliance does not damage the power cable - risk of fire or electrical shock. Only activate the appliance when the installation has been completed.

⚠ Be careful not to damage the floors (e.g. parquet) when moving the appliance. Install the appliance on a floor or support strong enough to take its weight and in a place suitable for its size and use. Make sure the appliance is not near a heat source and that the four feet are stable and resting on the floor, adjusting them as required, and check that the appliance is perfectly level using a spirit level. Wait at least two hours before switching the appliance on, to ensure that the refrigerant circuit is fully efficient.

⚠ All dimensions and spacing needed for installation of the appliance are in the Installation Instruction booklet.

⚠ **WARNING:** When positioning the appliance, ensure the supply cord is not trapped or damaged.

⚠ **WARNING:** To avoid a hazard due to instability, positioning or fixing of the appliance must be done in accordance with the manufacturer instructions. It's forbidden to place the freezer in such way that the metal hose of gas stove, metal gas or water pipes, or electrical wires are in contact with the freezer back wall (condenser coil).

ELECTRICAL WARNINGS

⚠ It must be possible to disconnect the appliance from the power supply by unplugging it if plug is accessible, or by a multi-pole switch installed upstream of the socket in accordance with the wiring rules and the appliance must be earthed in conformity with national electrical safety standards.

⚠ Do not use extension leads, multiple sockets or adapters. The electrical components must not be accessible to the user after installation. Do not use the appliance when you are wet or barefoot. Do not operate this appliance if it has a damaged power cable or plug, if it is not working properly, or if it has been damaged or dropped.

⚠ If the supply cord is damaged, it must be replaced with an identical one by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard - risk of electrical shock.

⚠ **WARNING:** Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.

CLEANING AND MAINTENANCE

⚠ **WARNING:** Ensure that the appliance is switched off and disconnected from the power supply before performing any maintenance operation. To avoid risk of personal injury use protective gloves (risk of laceration) and safety shoes (risk of contusion); be sure to

handle by two persons (reduce load); never use steam cleaning equipment (risk of electric shock). Non-professional repairs not authorised by the manufacturer could result in a risk to health and safety, for which the manufacturer cannot be held liable. Any defect or damage caused from non-professional repairs or maintenance will not be covered by the guarantee, the terms of which are outlined in the document delivered with the unit.

 Do not use abrasive or harsh cleaners such as window sprays, scouring cleansers, flammable fluids, cleaning waxes, concentrated detergents, bleaches or cleansers containing petroleum products on plastic parts, interior and door liners or gaskets. Do not use paper towels, scouring pads, or other harsh cleaning tools.

DISPOSAL OF PACKAGING MATERIALS

The packaging material is 100% recyclable and is marked with the recycle symbol . The various parts of the packaging must therefore be disposed of responsibly and in full compliance with local authority regulations governing waste disposal.

DISPOSAL OF HOUSEHOLD APPLIANCES

This appliance is manufactured with recyclable or reusable materials. Dispose of it in accordance with local waste disposal regulations. For further information on the treatment, recovery and recycling of household electrical appliances, contact your local authority, the collection service for household waste or the store where you purchased the appliance. This appliance is marked in compliance with European Directive 2012/19/EU, Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent negative consequences for the environment and human health. The symbol  on the product or on the accompanying documentation indicates that it should not be treated as domestic waste but must be taken to an appropriate collection center for the recycling of electrical and electronic equipment.

ENERGY SAVING TIPS

To guarantee adequate ventilation follow installation instructions. Insufficient ventilation at the back of the product increases energy consumption and decreases cooling efficiency.

Frequent door opening might cause an increase in energy consumption.

The internal temperature of the appliance and the energy consumption may be affected also by the ambient temperature, as well as location of the appliance. Temperature setting should take into consideration these factors. Reduce door opening to minimum.

You can increase storage capacity of frozen food by removing baskets and, if present, Stop Frost shelf.

Do not worry about noises coming from the compressor which are normal operation noises.

Keep the product away from heat sources.

Fast Freeze (if present) can be used for optimum appliance performance, 24 hours before placing fresh food in the freezer.

Please follow the instructions contained in the Quick Start Guide to activate/deactivate the function.

After placing fresh food in the freezer, 24 hours on Fast Freeze function is generally sufficient; After 50 hours the Fast Freeze function automatically deactivates.

Attention:

In order to save energy, when freezing small amounts of food, the fast freeze function can be deactivated after a few hours.

The user shall maintenance the refrigerating appliance in according to CLEANING AND MAINTENANCE chapter

The Gulf Conformity Marking on the product indicates the conformity with all the requirements of the Gulf Technical Regulation for Low Voltage Electrical Equipment and Appliances BD-142004-01.

Shelves

All of the drawers, door shelves and shelves can be removed.

Door

Door reversibility

Note: The direction of door opening can be changed. If this operation is performed by After-sales Service it is not covered by the warranty. Follow instruction in **Installation Guide**.

How to use the appliance

First time use

Wait at least two hours, after the installation, before connecting the appliance to the power supply. Connect the appliance to the power supply it starts the operation automatically. The ideal storage temperatures for the food are preset in the factory.

After turning the appliance on, you must wait for 4-6 hours for the correct storage temperature to be reached for a normally filled appliance. Position the antibacterial anti-odour filter in the fan as demonstrated in the filter packaging (if available). If the audible signal sounds, it means that the temperature alarm has intervened: press the button to switch off the acoustic alarms.

Freezer compartment food storage

The freezer compartment **✱***** allows long time storage of frozen food and freezing of fresh food. The quantity of fresh food that can be frozen in 24 hours is written on the rating plate. Arrange the fresh food in the freezing area inside the freezer compartment, leaving enough space around the food packages to allow air to circulate freely. It is advisable that you do not re-freeze food that has partially defrosted. It is important to wrap the food in a way that prevents the ingress of water, humidity or condensation.

Ice cubes

Fill 2/3 of the ice tray with water and put it back in the freezer compartment. Do not use sharp or pointed objects to remove the ice under any circumstances.

Removing the drawers

Pull the drawers outwards as far as they will go, lift them up and remove them. To get more volume, the freezer compartment can be used without the drawers. Make sure that the door is closed properly after putting the food back on the grilles/shelves.

Food shelf life at different temperatures

FROZEN COMPARTMENT			
Product	Storage period (-12°C)	Recommended Storage period (-18°C)	Storage period (-24°C)
Butter or margarine	1 month	6 months	9 months
Fish	1 month	1-3 months	6 months
Fruits (except citrus) & Vegetables	1 month	8-12 months	12 months
Meat- Ham- sausage Roasts (beef-pork- lamb) Steaks or chops (beef-lamb-pork)	1 month	2 months 8-12 months 4 months	12 months
Milk, Fresh fluid, Cheese, Ice cream or sherbet	1 month	1-3 months	5 months (not recommended for ice cream)
Poultry (chicken-turkey)	1 month	5-7 months	9 months

UNFROZEN COMPARTMENT			
Product	Storage period 0-3°C	Storage period (3-6°C)	Storage period 6-8°C
Cans, drinks, eggs, sauces, pickles, butter, jam	3-4 weeks	3-4 weeks	3-4 weeks
Tropical fruit	Not recommended	2-4 weeks	3-4 weeks
Cheese, milk, dairy food, deli food, yoghurt	2-5 days	2-5 days	2-5 days
Cold cuts, desserts, meat and fish and home-cooked food	3-5 days	1-2 days	Not recommended
Store vegetables and fruits (excluding tropical fruits and citrus)	15 days	10-12 days	4-7 days

How to defrost the freezer compartment (not needed on frost-free model)

1. It is advisable to set the temperature colder or turn on the Fast Freeze/Fast Cool* at least four hours before removing the food from the freezer compartment, to prolong the preservation of the food during the defrosting phase.
2. To defrost, turn the appliance off and remove the drawers. Put the frozen food in a cool place. Leave the door open to allow the frost to melt. To prevent the water from escaping during the defrost, it is advised that you place an absorbent cloth on the bottom of the freezer compartment and wring it out regularly.
3. Clean the inside of the freezer compartment and dry it carefully.
4. Turn the appliance back on and put the food back inside.

Functional sounds

1. A buzz generated by the compressor is normal while the product is working.
2. Gurgling and crackles are generated by the passage of the refrigerant gas inside the cooling circuit, therefore these are normal noises.
3. It's possible to "hear" creaks when the compressor is active and inactive: it is a normal sound of the product's structure.

4. Check that the balconies on the inside of the refrigerator door, the shelves and the drawers in the refrigerator compartment are attached and positioned properly, to avoid possible vibrations.
5. Don't place glass containers (bottles, jars, etc.) in direct contact with each other, to avoid vibrations.
6. This device is equipped with a compressor that operates at an optimum speed to minimize energy consumption. So it may happen that in certain situations (in summer or if large quantities of food are introduced) that the compressor increases the speed and therefore it is more noisy than usual.

Recommendation in case of no use of the appliance

In the event of non-use of the appliance

Disconnect the appliance from the power supply, empty it, defrost it (if necessary) and clean it.

Keep the doors slightly ajar to let air circulate inside the compartments. By doing this, you avoid the development of mould and bad odours.

In the event of an interruption to the power supply

Keep the doors closed so the food stays cold for as long as possible. Do not re-freeze food that has partially defrosted. If there is a prolonged power cut, the black out alarm may also activate (in products with electronics).

Cleaning and maintenance

Before any cleaning or maintenance operation, unplug the appliance from the mains or disconnect the electrical power supply.

Never use abrasives. Never clean refrigerator parts with flammable fluids.

Do not use steam cleaners.

The buttons and control panel display must not be cleaned with alcohol or alcohol-derived substances, but with a dry cloth.

Clean the appliance occasionally with a cloth and a solution of warm water and neutral cleaning agents specifically for cleaning the inside of the refrigerator.

To ensure the constant and correct flow of the defrosting water, regularly clean the inside of the drain situated in the back wall of the refrigerator compartment near the fruit and vegetable drawer using the utensil provided.
