

REZIDENCE

STAROPRAMENNÁ

Luminaires - maintenance instructions

- 1. Never replace the light source or make any modifications to the luminaires yourself. In these cases, always contact the management of Residence Staropramenná, which will arrange for the replacement or modification through your specialist.**
2. Luminaires and light sources must not touch flammable objects, the luminaires must not be covered by anything.
3. Some luminaires can reach high temperatures on their surface, which can cause damage to health. The luminaires can be touched after they have cooled down completely.
4. Clean the luminaires only if the power supply switched off safely, without cleaning agents and avoid wetting the electrical parts of the luminaire.
5. Do not expose luminaire surfaces or accessories to chemicals (acids, aggressive cleaning agents, fertilizers, chlorine-containing substances, water with high salinity, etc.).
6. Luminaires are intended only for their intended function and it is therefore not possible to use them in other functions, such as: hangers, pads, decoration holders, sports equipment, kitchen equipment, umbrellas, etc.
