

INTERNET ACCESS

Instructions for Use

UTP cable:

- A revived UTP supply cable is introduced into each apartment, which is placed in a low-current switchboard at the entrance to the apartment and it will not be necessary to revive it further.
- Caution: If the client connects this cable directly to a device using the Internet, the device will connect to the Internet. Attention: Directly connected devices to the supply, even if it is a connection via a switch, will behave like one large network in the building. For safety reasons, we do not strongly recommend this.

-

Internet:

- free internet connection provided by Vodafone. This connection is shared by all the tenants and it has the following parameters:

- **Download** - maximum speed 1000 Mbps / usual 600 Mbps / minimum 300 Mbps

- **Upload** - maximum speed 50 Mbps / usual 30 Mbps / minimum 15 Mbps.

- You will not need a password to connect.

If you have any questions about this free internet, please contact the administrator of Residence Staropramenna: spravce@rezidencestaropramenna.cz.

Router / wi-fi router:

- if the tenant wants to use the free internet provided by the landlord, he will ensure his own router or wi-fi router in the quality and compatibility that he will require **/connector RJ-45/**. **The list of recommended routers enclosed, all of them available at internet shop Alza.cz.**

- place this router in the switchboard, where you connect it to the data cable marked with the your appartement number - 1 (eg 301-1, 506-1). Then the router works as wifi for the whole apartment.

- If you want to bring the Internet to the data sockets in the rooms, then connect the cable corresponding to the room to the router. Usually you find DATA-1 in the living room), DATA-2 in the bedroom), etc., this way the data sockets will come to life.

The building is also connected to the O2 network with a metal cable TCEPKFLE XN0.5 with a capacity of 100 pairs, which allow ADSL or VDSL connection. There are 100 lines on which the Internet or O2 TV can run. The tenants will have to secure the contract with O2 themselves, either via the website or in person at any O2 branch.

Services of other providers

If the tenant wants to take advantage of the offer of paid services of other Internet or TV providers (Vodafone or O2), he will have to use the equipment recommended by this provider, which usually also ensures the commissioning of the service.

Vodafone:

For more details regarding the offer of paid Vodafone services, please contact a Vodafone representative **Mr. Filip Šulc:**

Ing. Filip Šulc, New Build Specialist Senior, +420 773 920 333, filip.sulc2@vodafone.com

O2:

For more details regarding the offer of paid O2 services, please contact a www.o2.cz
